

SHAFT DRIVE DEVICE

ABSTRACT

5 The present invention creates a shaft drive device,
having a PCB device (1, 1'); a rotor device (50; 5, 51) with
a rotor (5) and a rotor shaft (51) attached to it; and a
stator device (40) for driving the rotor (5) with the rotor
shaft (51); an attachment device (60) for attaching the rotor
device (50; 5, 51) and the stator device (40) to the PCB
device (1, 1') in such a way that the PCB device (5) forms
10 part of the frame, surrounding the rotor shaft, of the shaft
drive device.
